	Examiner Alexander Thomas	Art Unit 1772	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 2/15/06 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 4, 5, 9-12, 14, 16, 20 and 23 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by WO 00/56541. See Figure 4 and page 4, line 2 through page 7, line 6.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 1772

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3, 13 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 00/56541. The reference discloses the invention substantially as claimed; see Figure 4 and page 4, line 2 through page 7, line 6. However, it does not disclose the use of the particular fibers or titanium alloys, but does disclose that carbon and glass fibers are known to be used in similar laminates. It would have been obvious to one of ordinary skill in the art to use any well-known fiber or titanium alloy in the product of the reference in order to provide the desired properties for a particular end use in the absence of unexpected results attributable to the claimed materials.

6. Claims 7, 17, 19, 21, 22, 24 and 38-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 00/56541 as applied to claims 1, 2, 4, 5, 9-12, 14, 16, 20 and 23 above, and further in view of Westre et al ('272). The secondary reference discloses the use of adhesives in laminates similar to the primary reference; see column 3, lines 22-25. It would have been obvious to one of ordinary skill in the art to use adhesives to bond the layers of the product in the primary reference in view of the teachings in the secondary reference to enhance bonding of the layers.
